

# Are your business risks a GAMBLE?

## RISK MANAGEMENT

Atlas Risk Management is a structured approach and method to manage uncertainties related to threats and risks your company is facing in the Caribbean region.

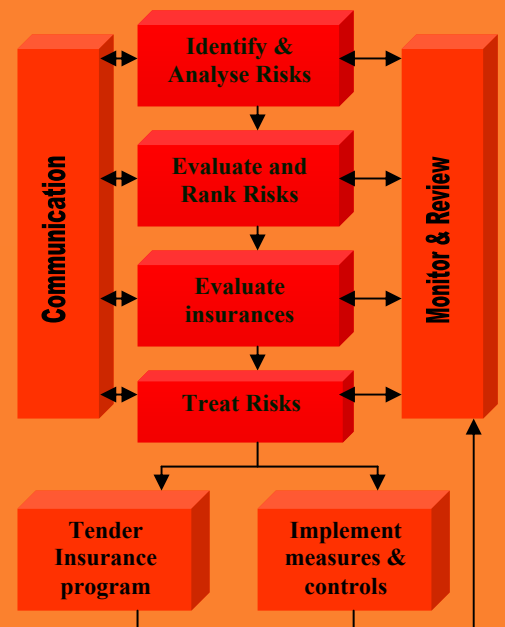

Our method includes a complete risk assessment and development of strategies to minimize, control, mitigate and manage your business risks.

The strategies include transferring the risk to another party (insurance or re-insurance company), avoiding the risk by implementing certain measures, reducing the negative effect of the risk, and accepting some or all of the consequences of a particular risk and last but not least communicating the risks.

Risks every business experience:

Below you find our Atlas Risk Management model which describes the ongoing process of this method.
